Any Questions?

What is a Qualified Lead?

A Qualified Lead is a Chat Conversation in which our agent captures the name, phone, email and requirement of the web visitor. You set the Qualification criteria and we follow it.

What if I get a Lead that's not Qualified?

Reply to us & REJECT the lead. Add a brief reason of rejection and we will take it off your bill. No questions asked.

How do you get to know my business?

We'll send a response guide for you to complete about the most common customer queries, and how to respond to them. In order to serve your customers, the more we know about your business the better. Should you want to update how we deal with visitors, we're only an email away.

How do you know who to send chats to?

We will collect the emails and text alerts number and add those in our portal so that you and anyone else on your team can have access to the lead data.

Am I bound to a long-term contract?

Not at all – we understand that you don't want to be bound by a long-term contract. However, we do require a one month's notice to close your account from the date of your next invoice.

How is Live Chat added to my website?

You simply need to add a small piece of code to your website. It really is that simple. Once integrated, whenever a potential customer chats on your website, that conversation will pass to us automatically: all the time or just when you're unavailable.

24/7/365 Support

An uninterrupted activity on your website, a non-stop journey

To make the most of every visitor opportunity, our chat agents remain active on your website 24/7/365.

Web-Based Chat Portal

We'll make the live chat widget blend with your website theme

It's important to consider your branding while having the chat feature up. That's why we have the widget blending with the overall look of your website.

Your Visitors Can Even Text or SMS You 24/7

Your Website Gets a Dedicated Texting/SMS number and You can Publish it Anywhere to Engage New Prospects 24/7. Clients who send you a text message on this number will immediately be connected to our 24/7 live chat staff.

Monthly Reporting

Stay updated with lead conversion stats every month

You will be sent a monthly report including all useful stats showing a complete picture of our performance, along with the user engagement trends on your website.

Personalized Script

Our chat flow comes from what we're good at and your suggestions

The script will be based on how you would like us to greet your visitors. We'll share guidelines having the essence of our support experience.

Google Analytics Integration

Our software supports easy integration with Google Analytics for tracking purpose.

Get More Leads From the Traffic You Already Have

Best Practices

Response Guide

Please provide as much information and detail as possible when completing the response guide. Include any FAQs and other info about your products or services that you would like for our live chat team to provide customers with.

You can also easily update and add to the response guide moving forward.

Follow Up With Leads

Your team will receive an email notification as soon as the chat is complete. You can also provide phone numbers to receive a text notification.

We recommend following up with these leads as soon as possible to increase the likelihood of closing the lead.

Within the first 2 hours is ideal if possible, but definitely within 24 hours.

Remarketing

We recommend adding these users to your database and can help you with remarketing campaigns to build brand awareness and invite them to continue to do business with you.

We recommend running remarketing campaigns with display, email, and text message marketing.
